

DRM Digital Radio

Overview and Business Proposition

Workshop Rádio Digital

22 January 2025

Introduction

Ruxandra Obreja

Chair of DRM Consortium

DRM Consortium

Not for profit organization

Global Presence

- Germany, India, Brazil, *South Africa* (www.drmsa.org)
- Expert groups in Pakistan, Indonesia

Over 100 International Members

- Includes: broadcasters, network operators, regulators, manufacturers, research organizations etc.

Internal Experts and Technologists

- Maintains DRM standards
- Provides subject matter expertise and advise

Several of the DRM Consortium Members

The not-for-profit DRM Consortium supports and promotes the DRM Standard and its take-up globally

DRM Digital Radio Mondiale – Some Facts

DRM Technology

Standard

- Global open digital radio standard
- ITU Endorsed
- Public Specification

Accessible to All

- Non-proprietary
- Full and free access to spec by all
- No trade secrets or not under control of a single company

LF

MF

HF

VHF

DRM

All Band Support

- The only ITU standard supporting all frequency bands and coverage needs
 - Same standard and features for all bands
- **Direct digital successor technology for analogue AM/FM**

DRM Works In All Frequency Bands

DRM for local / regional coverage (VHF bands)
(Band I, II – FM band, III) 30 MHz

DRM for medium/large area coverage (AM bands)
(or LW, MW, SW) – the AM bands

**DRM Digital Radio standard – One single standard:
Same key features throughout**

DRM Serves all Coverage Needs

VHF bands
Local/regional
coverage

AM bands
Large-area
coverage

DRM Global Status

India

China

Indonesia

South Africa/Key African countries

Brazil

Pakistan

DRM Key Features and Benefits – Listeners’ Perspective

- **More choice** for listeners
 - Up to **3 programmes + multimedia on 1 frequency**
 - Simulcast analogue / digital
- **Excellent audio** quality
 - No distortion or interference
 - Stereo and 5.1 surround sound
- **Multimedia Applications**
 - Great listener benefits
 - Extra revenue opportunities for broadcasters
- **Good coverage** area and robust signal
 - Supporting (Single Frequency Networks)

- **Automatic tuning**
 - by station name, no longer by frequency
 - re-tunes when leaving coverage area
- **Emergency Warning Functionality EWF**
 - Automatic wake-up, all stations switch, present audio and text information

Emergency
Warning
Functionality

DRM EWF – Emergency Warning Functionality

Emergency
Warning
Functionality

DRM Digital Radio has all required tools built-in for a quick and complete mass-notification in case of disasters

“Digital Radio Mondiale (DRM) natively supports emergency alert signalling (... EWF). DRM receivers are triggered to re-tune automatically to an emergency transmission (including optional auto-switch-on) while flashing the screen and increasing the audio volume.”

ITU-R Study Group 6 chair Yukihiro Nishida - Advantages of radio broadcasting in emergency and disaster situations

Benefits – DRM Distance Learning

- Lessons and textbook-content via **Journaline**
→ Always available on-demand, even for self-study
- At specific times, with **live teacher** (audio service)
→ Scheduled by language / class level / subject
(up to 3 in parallel per channel → **scalable!**)
→ Referencing the current Journaline textbook location
- Options for student **interactivity**: Journaline Quiz, Q&A re-broadcast, etc.

How it works: Please check out this video: s.drm.org/video-education

Benefits - Spectrum Efficiency – White Spaces in the FM Band

DRM fits anywhere in the FM gaps!

DRM can be accommodated even in the congested FM Band in Johannesburg, (e.g; 50 extra programmes!)

3 Programmes
100 kHz bandwidth

Multichannel: 6 Programmes

2 x 100 kHz bandwidth

Benefits - Spectrum Efficiency – White Spaces in the FM Band

DRM fits anywhere in the FM gaps!

DRM can be accommodated even in the congested FM Band in Johannesburg, (e.g; 50 extra programmes!)

3 Programmes
100 kHz bandwidth

Multichannel: 6 Programmes

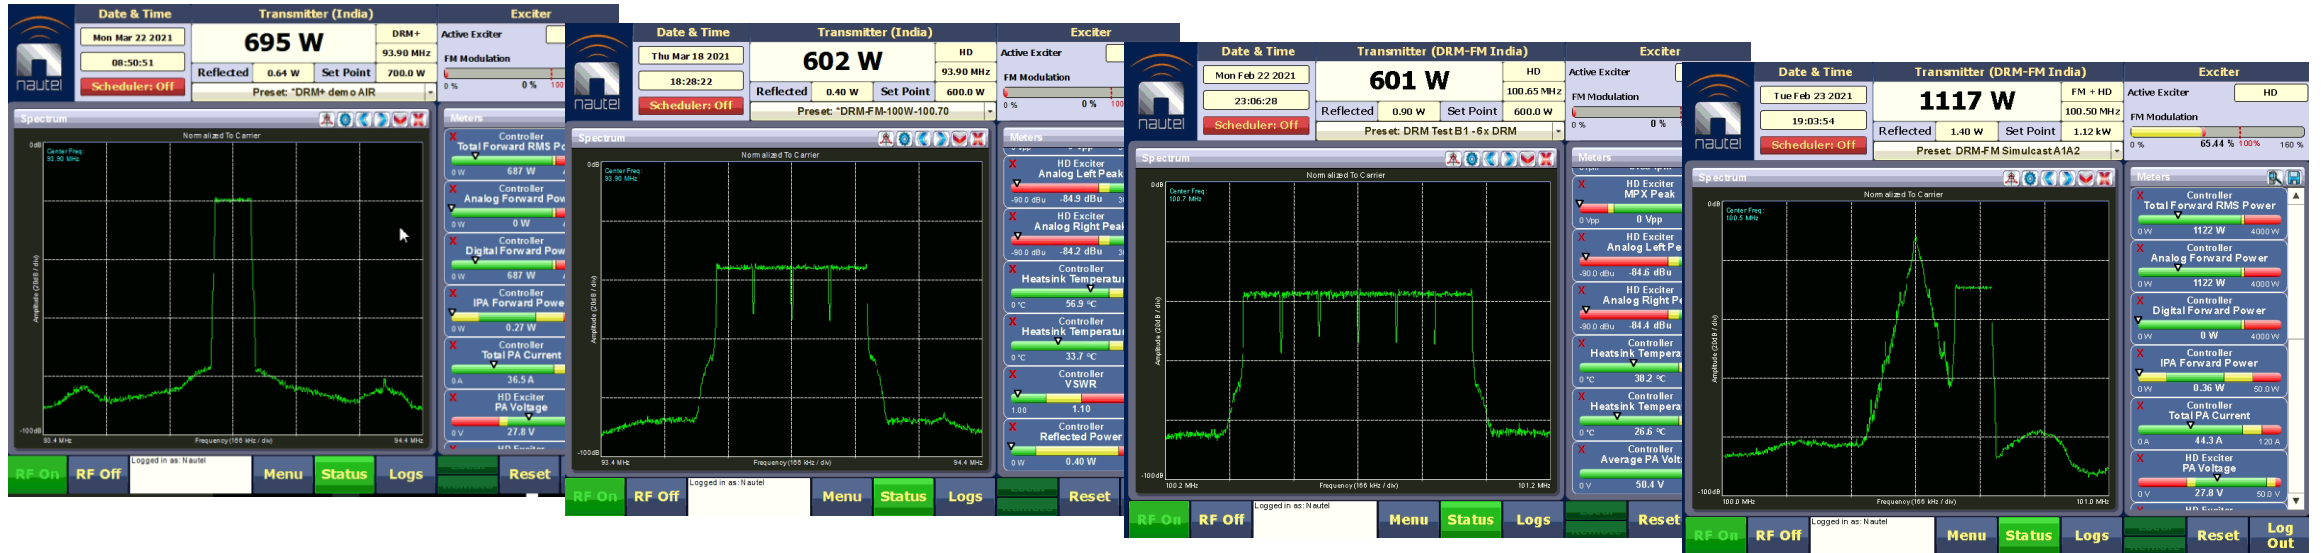

2 x 100 kHz bandwidth

Benefits with Newest Development - DRM Multichannel

- ✓ Broadcast multiple digital radio signals from a single transmitter
 - Save CAPEX and OPEX!
- ✓ Optimize FM spectrum resources – needs only 1/3 of the spectrum of a DAB multiplex (0.6 vs 1.7 MHz for 18 audio channels)
- ✓ Fully compatible – no special receivers required
- ✓ Successfully demonstrated in India in 2020 on-air (Report: [s.drm.org/8wBg](https://www.s.drm.org/8wBg))
- ✓ Will be tested in Johannesburg (trial license application in progress)

Multi-DRM Broadcasts by a Single FM Transmitter

1x DRM

4x DRM

6x DRM

FM+DRM

- ✓ Not a 'multiplex' solution operated by a third party
- ✓ All broadcasters are in full control of their content and operation

Receiver Ecosystem Built on Solid Ground: Our Foundation is Set

Over 6 million on-road cars in India have DRM support

Mahindra

Mercedes-Benz

TATA

HYUNDAI

DRM Digital FM reception on mobile phones

Bringing the Beat Home

Car, Portable, Mobile DRM Receivers and chip, module solutions

Manufacturers in **China, Germany, India, UK, South Korea** are producing DRM receivers and are willing to do **local manufacturing**.

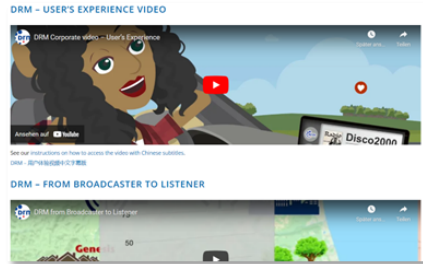

DRM Standard – Superior Technology

- ✓ **DRM** is efficient, green - saves spectrum and energy
- ✓ **DRM** reaches people wherever they are, even outside broadband/internet coverage
- ✓ **DRM** offers more than audio: access to information, entertainment, **emergency warnings** and **education**
- ✓ **DRM** offers broadcasters the latest broadcast options (**transmitter sharing – Multichannel**)
- ✓ **DRM** enables **local stations to be heard!**
- ✓ **DRM** offers **more channels, more creative services, ad revenue (with text), communication – more jobs and \$\$\$!**

**The DRM ecosystem is ready,
and the Consortium is prepared to
support its implementation**
